

**1002 - 1.2m Trough Slide**

## Slides - 1.2m Trough Slide

Trough slides are a firm favourite and the most cost effective sliding solution for a play area. Slides are a great way for children to have fun and they also encourage children to be brave when sliding down. Sliding can help benefit children's physical aspects such as their core muscles, balance and co-ordination.

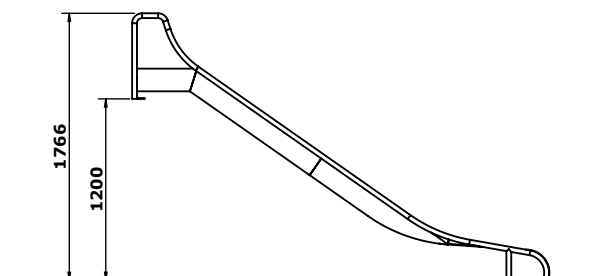

Our modern design take on the trough slide with its curved sides is more aesthetically pleasing and always a welcome design addition to any playground. All of our trough slides can be fixed to a platform or can be freestanding on an embankment.

All of our trough slides are manufactured from stainless steel, and have a tube edging. Various surface finishes are also available.

**1002 - Surfacing Overview**
